O.</u>                                                          | <u>Description</u>                                                                                                                                                                                                                                                                                                                                                                            | <u>Available in:</u>            |
|---------------------------------------|-------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------|
| <b>Alu Anti-Seize<br/>(Nickel)</b>    |   | Pellox Anti-Seize compound consists of finely divided metallic particles in a non-melt grease base. Pellox Anti Seize compound will prevent seizing and binding of threads in extreme temperatures. This compound can withstand surface temperatures of up to 1100°C without hardening. Use on intake manifolds, cylinder head studs, gaskets, and any threads where extreme heat is present. | 400ml Aerosol<br><br>1kg / 5 kg |
| <b>Anti-Spatter<br/>Silicone-Free</b> |  | Pellox Silicone-Free Anti-Spatter prevents sticking of spatter to the gas nozzle, contact tip and surface being welded, thereby prolonging the life of these parts. Pellox Silicone-Free Anti-Spatter consists of non-flammable safety propellants and organic chemicals. It will not affect paint in the welded area. Make sure that excess product is removed before painting.              | 400ml Aerosol<br><br>25 L       |

|                                          |                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                             |
|------------------------------------------|------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|
| <b>Anti-Spatter Silicone</b>             |   | <p>Pellox Anti-Spatter Silicone base is used to prevent adhesion of spatter to the gas nozzle, contact tip and surface being welded, thereby prolonging the life of these parts. If the surface is to be painted use Pellox Silicone-Free Anti-Spatter.</p>                                                                                                                                                                      | <p>400ml/500ml Aerosol</p>                  |
| <b>Anti-Spatter Water Base</b>           |   | <p>Pellox Anti-Spatter Water Base is a silicone-free Anti-Spatter that prevents sticking of spatter to the gas nozzle, contact tip and surface being welded, thereby prolonging the life of these parts. Pellox Anti-Spatter W/B is non-flammable, bio-degradable and an environmentally friendly alternative to use. It will not affect paint in the welded area. Make sure that excess product is removed before painting.</p> | <p>1L spray bottle<br/>5L, 25LK bottles</p> |
| <b>Aluminium/Stainless Steel Cleaner</b> |  | <p>Pellox Aluminium and Stainless-Steel Cleaner can be used for cleaning and removing tarnish from all stainless steel and aluminium surfaces. It can be used for the exterior cleaning of tanks in dairies, wineries and food factories. It is ideal for brightening up newly manufactured tanks before delivery.</p>                                                                                                           | <p>25 L/ 210 L</p>                          |

|                                     |                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                          |                                           |
|-------------------------------------|------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------|
| <b>Blue general-purpose cleaner</b> |   | <p>Pellox GPC is a liquid specially designed for hotels, institutions, hospitals, and public places. General Purpose Cleaner cleans more efficiently than most ordinary detergents and leaves no soap residue. It is versatile and there is no need for a variety of different cleaners.</p>                                                                                                             | <p>5L/25L</p>                             |
| <b>Chain Pin Bush Lubricant</b>     |   | <p>Pellox Chain Pin Bush Lubricant is an oil that is formulated with selective compounds, to effectively penetrate and lubricate chain pins and bushes. Pellox Chain Pin Bush Lubricant remains effective after penetrating the close-close metal surfaces. The compound provides a long-lasting film which effectively lubricates the metal surfaces so that they run smoothly with far less water.</p> | <p>400ml aerosol</p>                      |
| <b>Copper Anti-Seize</b>            |  | <p>Pellox Copper Anti-Seize is a light consistency, non-melt, anti-seize compound. The combination of anti-corrosive copper and graphite ensures an outstanding anti-seize and sealing compound for general maintenance and assembly procedures. Pellox Copper Anti-Seize will not harden.</p>                                                                                                           | <p>400 ml Aerosol<br/><br/>500g / 5kg</p> |

|                                  |                                                                                   |                                                                                                                                                                                                                                                                                                 |                       |
|----------------------------------|-----------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| <b>CPC – Coating Resin Spray</b> |  | <p>Pellox Coating Resin Spray is used as a protective coating on rigid and flexible circuit boards and impregnates porous substrates, such as ceramics, to improve moisture resistance.</p>                                                                                                     | <p>400 ml Aerosol</p> |
| <b>Crack Detector</b>            |  | <p>Pellox Crack Detector is a non-destructive, easy, quick and inexpensive testing method. It is especially designed to help detect the normally difficult-to-find flaws, pores, cracks and similar defects in metals. The product is sold as 3 parts: 1) Cleaner 2) Penetrant 3) Developer</p> | <p>400ml Aerosol</p>  |

|                       |                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                               |
|-----------------------|------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|
| <b>Cutting Oil</b>    |   | <p>Pellox Cutting Oil is suitable for most ferrous and non-ferrous metals, thereby reducing your inventory to one cutting oil. The additives provide lubrication at the tool tip, increasing tool life and improving chip break on tools. It improves surface finish on any speed or feed. Pellox Cutting Oil is recommended as an oil for all medium to heavy work on single and multi-spindle machines. It is particularly recommended where cutting oil rationalization is required, and where material is changed frequently.</p> | <p>400ml Aerosol</p>          |
| <b>Easy Out</b>       |   | <p>Pellox Easy Out is a fast-acting penetrant for freeing rusted and seized nuts and bolts, locks, hinges and all kinds of industrial equipment. It will not damage the parent metal.</p>                                                                                                                                                                                                                                                                                                                                             | <p>225 ml / 400ml Aerosol</p> |
| <b>Engineers Blue</b> |  | <p>Pellox Engineers Blue provides an even clean film, which dries rapidly to give sharp, clear definition of scribed lines.</p>                                                                                                                                                                                                                                                                                                                                                                                                       | <p>400ml Aerosol</p>          |

|                               |                                                                                    |                                                                                                                                                                                                                                               |                                             |
|-------------------------------|------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|
| <b>Hand Cleaner Lano</b>      |   | <p>Pellox Hand Cleaner is a gel-form waterless hand cleaner which can be readily spread on the hands and easily wiped or rinsed off with water, without leaving any sticky or undesirable residue on the skin. It comes in pink or white.</p> | <p>1kg/ 5kg/ 20kg<br/>(500g on request)</p> |
| <b>Hand Cleaner with Grit</b> |   | <p>Pellox Hand Cleaner with Grit is a brown gel-form, waterless hand cleaner with an abrasive for easy and effective cleaning of grease, ink and general workshop grime from your hands.</p>                                                  | <p>1kg/ 5kg/ 20kg<br/>(500g on request)</p> |
| <b>Liquid Hand Soap</b>       |  | <p>Pellox Liquid Hand Soap is a pleasant-smelling quality hand cleaner, containing germicidal agents, which disinfects and cleans hands. For liquid hand cleaner dispensers.</p>                                                              | <p>5L/ 25L</p>                              |

|                                      |                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                      |
|--------------------------------------|------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|
| <b>Penetration Oil / AT 112</b>      |   | <p>Pellox Penetration Oil is a blend of solvents, corrosion inhibitors and an oil petroleum-based solvent. It acts quickly to free rusty threads on studs, nuts and bolts. Pellox Penetration Oil contains coating agents and water release additives that bead up water films, causing them to drop off or evaporate away, leaving an oily protective layer that gives efficient indoor corrosion protection and insulation from the elements.</p> | <p>225ml/400ml Aerosol / 5L/ 25L</p> |
| <b>Penetration Oil with Graphite</b> |   | <p>Pellox Penetration Oil with graphite's penetrating power acts to get through any scale formation, to break the interfacial tension that binds corroded parts. The graphite is also excellent for lubricating locks.</p>                                                                                                                                                                                                                          | <p>400 ml Aerosol</p>                |
| <b>Pine Gel</b>                      |  | <p>Pellox Pine Gel is a pleasant, pine-smelling cleaning gel that can be used in Kitchens, Bathrooms, on tiles, baths, toilets etc.</p>                                                                                                                                                                                                                                                                                                             | <p>1Kg 5Kg 20Kg</p>                  |

|                           |                                                                                    |                                                                                                                                                                                                                                                                                                                                              |                      |

| <b>Safety Solvent</b>     |   | <p>Pellox Safety Solvent is a non-flammable, non-corrosive, non residual, fast evaporating, inhibited solvent cleaner and degreaser, with high dielectric strengths.</p>                                                                                                                                                                     | <p>400ml Aerosol</p> |
| <b>Silicone Lubricant</b> |   | <p>Pellox Silicone Lubricant is a general all-purpose continuous film lubricant for mechanical parts and sliding surfaces constructed of plastic, rubber, or metal. It is perfect to lubricate bicycle chains, cables and to loosen seized and rusted nuts. It lubricates garage doors and keeps tools in a rust-free working condition.</p> | <p>400ml Aerosol</p> |
| <b>Silicone Release</b>   |  | <p>Pellox Silicone Release is a water-based clear liquid and highly effective release agent producing especially fine results with hard to release materials. It is easily applied, speeds up work and increases production. It ensures positive release from moulds and gives a superior finish to the product.</p>                         | <p>400ml Aerosol</p> |

|                              |                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                            |                |
|------------------------------|-----------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| <b>Tack Spray</b>            |  | <p>Pellox Tack Spray ensures a long tacky surface to special additives. It is specially designed to lubricate and to protect exposed gears, chain drives, wire ropes and heavy machinery. It also acts effectively as an anti-slip preparation when applied to transmission and conveyer belt pulleys. It is even efficient under water.</p>                                                               | 400ml Aerosol  |
| <b>Water-based Degreaser</b> |  | <p>Pellox Engine Cleaner/Water-based Degreaser is a concentrated alkaline liquid cleaning compound containing synthetic detergents and organic solvents. It is a non-flammable medium-duty water-based detergent/degreaser. It is intended for the cleaning of painted and unpainted surfaces and plastic surfaces, of equipment walls and floors that are soiled with oil, grease, and similar soils.</p> | 500ml/ 5L/ 25L |
